

Final Project – Individual Activity (GUI-Based Application)

Subject: Object Oriented Programming (JAVA)

Deadline: May 2025, I'll update you about the exact day

Checking: Face-to-face presentation only (no online checking)

✦ Project Overview:

For your final project, you are required to create a GUI-based application with more features than the basic sample (like the Iced Coffee Ordering App). This is an individual project, and each student must submit a unique concept.

✓ Note: This app must be working, fully interactive, and presented during our face-to-face checking session.

✗ No database required, but your program must still manage and process data using variables or lists.

✓ PROJECT REQUIREMENTS:

Graphical User Interface (GUI):

Organized layout (frames, labels, inputs, buttons, etc.)

Clean and readable UI

Features & Functionality:

Add/Remove/Edit actions

Calculations (e.g., price totals, scores, dates)

Must handle user input and update dynamically

Programming Techniques:

Use of functions and/or classes

Basic data management

NO DATABASE

Extra Functionality:

Filters (e.g., search or sort)

Summary or confirmation display

Multi-step interaction (like tabs or multi-screens)

🚫 IMPORTANT NOTES:

- ✗ No duplicates – each student must submit a unique concept
- ✗ No static output – it must respond to inputs (functional buttons, etc.)
- ✗ No GUI-only or incomplete programs
- ✓ Originality is a must – do not copy online examples directly

//

Since mabait pa naman ako, there will be **no written final exam**. Instead, this **individual final project** will serve as your **final exam grade**.

Good luck! Galingan niyo na ha, ito na ang finals niyo. 😊
